Applicant Signature Date	

SEE INSTRUCTIONS ON BACK

INSTRUCTIONS

SECTION 1: Licensee

- Complete one form for each guarantor and each unlicensed feed facility.
- If the feed facility does not have a physical address, provide directions from the nearest cross roads.
- Ownership name is that listed for the Federal ID.

SECTION 2: Type of Operation – Check all that apply

- The guarantor is the licensee responsible for the product. The exact name and address of the guarantor must be designated on the product label.
- A feed facility is a site where feed, a component of feed, or feed ingredients are mixed, custom blended, ground, unground, manufactured, milled, bagged, salvaged, or processed.
- Products normally exempt but containing toxins are subject to control by the Service. For example, but not limited to, whole corn containing aflatoxin above 20 ppb. Refer to Feed Industry Memorandum's 5-12, 5-17 and 5-20 found on our website. <http://otsc.tamu.edu>
- Aflatoxin binding agents or customer formula feeds containing aflatoxin binding agents are subject to control by the Service. Refer to Feed Industry Memorandum 5-23 on our website. <http://otsc.tamu.edu>

SECTION 3: License Class

- Those who check guarantor 'NO' and facility 'YES' in Section 2 do not need to complete this section.
- Tonnage refers to products that are distributed in larger than five pound packages or bulk.
- Annual products are products packaged in individual containers of five pounds or less only.
- If the product is distributed in less than five pound containers and also larger containers, it is a tonnage product.

SECTION 4: Identification of Facility Production

- Those who check guarantor "NO" and facility "YES" in Section 2 do not need to complete Section 4.
- If the guarantor uses only one feed facility, the response in the unique identifier blank should be "All products distributed by this guarantor are produced only at the feed facility listed."
- This identifier is required for each feed facility and the application form will not be accepted without it.
- The most useful information to identify the feed facility would be that portion of a feed facility's batch code or lot number which identifies where it was produced; however, other methods of identification will also be accepted.

SECTION 5: Application Fees

- Each licensee must pay the \$75.00 license fee.
- A \$75.00 late fee is required with applications received after 30 days from the date on violation correspondence.
- Guarantors are responsible for the payment of all fees.
- Licensees may distribute both annual products and tonnage products for the same license fee; however, they owe both the annual product inspection fees and the minimum annual tonnage inspection fee.

License No.	Facility Name	City, State	Unique Identifier
Continue on additional sheet if necessary.
