June 2003
Introduction

The Association of American Feed Control Officials (AAFCO) is an organization of state and federal feed regulators advised by industry representatives with the sole purpose of designing feed regulations that are fair and equitable to both consumers and industry. This booklet will provide you with the necessary information and guidelines so you can design and produce commercial feed labels that meet AAFCO model regulations. Feed labels designed according to these guidelines will be accepted by states that recognize the AAFCO model regulation. Prior to distributing commercial feeds in any state or territory, consult with the corresponding feed control official. (A list of members can be found starting on page 36) The information included in this guide is derived from the 2002 AAFCO Official Publication. For complete labeling information refer to the current issue of the AAFCO Official Publication. To obtain the Official Publication go to the AAFCO web site at http://www.AAFCO.org or contact Sharon Senesac, AAFCO Assistant Secretary-Treasurer, at (765) 385-1029.

What is the purpose of a feed label?

A feed label allows the purchaser to select a product to meet their production needs. A label instructs the purchaser how to use the product to obtain the best benefits and results. In addition, a label of uniform format and composition provides a level field of play for both the purchaser and distributor.

What information is on a feed label?

A commercial feed label contains information describing the feed product and details necessary for the safe and effective use of the feed. This includes: product name, the purpose of the product, levels of essential nutrients provided, the ingredients used to make the feed, directions for use, cautions and/or warnings, the person or firm responsible for the feed, and net weight of the package.
Label Design

Customer Formula Feed Labels

(See example on page 18)

“Customer-formula Feed” is commercial feed which consists of a mixture of commercials feeds and/or feed ingredients, each batch of which is manufactured according to the specific instructions of the final purchaser.

The label for each delivery of a "customer-formula feed" must include:

• Manufacturer's name and address.

• Purchaser's name and address.

• Date of delivery or sale.

• The customer-formula feed name and brand name, if any (the name should reference the species and animal class).

• The complete name and net quantity of each commercial feed and other ingredients (commercial supplements, grain, minerals, etc.) used in the customer-formula feed.

• Directions for use and precautionary statements, if required.

• The following information if the customer-formula feed contains a drug:
  - The claim statement for each drug contained in the customer-formula feed.
  - The name and level of each active drug ingredient.

Branded Feed Labels

(See examples of labels on pages 19-34.)

The label for each package or bulk delivery of branded feed products must contain all of the following information in this specified order:

• The product name and its branded name, if any.

• The purpose statement of the feed (identifying specific species and animal class).

• The guaranteed analysis statement.

• The ingredient statement.

• Directions for safe and effective use and any required precautionary statement.

• The manufacturer's or distributor's name and address.

• A statement of net quantity.

• The following information if the feed is medicated:
  - The word "Medicated" directly below the product name.
  - The claim statement for each drug contained in the feed product.
  - The name and level of each active drug ingredient.
Label Formatting
(for Branded Feeds)

Product & Brand Names

- The product or brand name must be appropriate for the feed’s intended use and may not be misleading in any way.
- If the product name indicates a specific purpose, the feed's composition must correspond. (For example: starter, finisher or complete feed.)
- The name of the feed cannot be comprised of the names of one or more of the ingredients, unless all the ingredients used to make the feed are included in the feed's name.
- An ingredient or a combination of ingredients can be used in the product name if it imparts a specific characteristic to the product and that characteristic is significant to the product's purchaser and are quantified by guarantees in the "Guaranteed Analysis" statement.
- The word "protein" cannot be used in the product name if the feed contains any added "non-protein nitrogen".
- If the product name has a percentage value it will be referenced to the quantity of protein unless it is otherwise noted. (12% Horse Feed)
- Single ingredient feeds must have a name that meets the AAFCO official definition for that feed product.
- If the product or brand name contains the word "vitamin," the vitamin must be guaranteed in the "Guaranteed Analysis" statement. (Horse Feed with Vitamin E requires a guarantee for the minimum level of Vitamin E.)
- The term "mineralized" can only be used for "trace mineralized salt".

Purpose Statement

A purpose statement provides the feed purchaser with information on the specific species and animal class for which the feed is intended.

The purpose statement may be excluded if the product or brand name identifies the species and class for which the product is intended. (Lactating Dairy Mixing Mineral)

The purpose statement of a premix or single purpose ingredient or ingredient blend may exclude the animal class and species and state "For Further Manufacture of Feed." These feed products can be used to manufacture feeds for various animals and classes. (Soybean meal).

A manufacturer can be flexible with more specific and common language but must be consistent with the following categories of animal classes.

Specific Species and Class Purpose Statements

Dairy Cattle:
- "Veal milk replacer" for milk replacer fed to veal calves.
- "Herd milk replacer" for milk replacer fed to herd replacement calves.
- "Starter" for dairy animals 3 days-3 months.
- "Growing Heifers, Bulls and Dairy Beef"
  - Grower 1:3-12 months of age
  - Grower 2:more than 12 months of age
- "Lactating Dairy Cattle" for dairy cattle of that class.
- "Non-Lactating Dairy Cattle" for dairy cattle of that class.
Beef Cattle:
• "Calves" for beef cattle from birth to weaning.
• "Cattle on pasture" for weaned cattle other than feedlot cattle. The word "cattle" may be replaced by a more specific word such as stockers, feeders, replacement heifers, brood cows, or bulls.
• "Feedlot cattle" for weaned cattle kept in a feedlot.

Swine:
• "Pre-Starter" weight 2 to 11 pounds.
• "Starter" weight 11 to 44 pounds.
• "Grower" weight 44 to 110 pounds.
• "Finisher" weight 110 to 242 pounds.
• "Gilts, Sows and Boars."
• "Lactating Gilts and Sows."

Poultry:
• "Layer" for chickens that are grown to produce eggs for human food.
  - "Layer Starting/Growing" for chickens that are less than 10 weeks of age.
  - "Layer Finisher" for chickens that are at least 10 weeks of age but not yet laying eggs.
  - "Layer Laying" for chickens that are currently laying eggs for human food.
  - "Layer Breeders" for chickens that are currently producing offspring grown to produce eggs for human food.
• "Broilers" for chickens that are grown for human food.
  - "Broilers Starting/Growing" for chickens less than 5 weeks of age.
  - "Broilers Finisher" for chickens over 5 weeks of age.

Turkeys:
• Grown for human food.
• "Turkeys Starting/Growing" for female turkeys less than 13 weeks of age or male turkeys less than 16 weeks of age.
• "Turkeys Finisher" for turkeys that are one of the following:
  - Females that are 13 weeks to 17 weeks of age.
  - Males at least 16 weeks of age.
• "Turkeys Laying" for female turkeys that are currently producing eggs.
• "Turkeys Breeder" for turkeys, grown to produce fertile eggs, that are not yet producing fertile eggs.
Sheep and Goat:
- "Starter"
- "Grower"
- "Finisher"
- "Breeder"
- "Lactating"

Duck and Geese:
- "Ducks, Starter" for ducks less than 3 weeks of age.
- "Ducks, Grower" for ducks 3 to 6 weeks of age.
- "Ducks, Finisher" for ducks more than 6 weeks of age that are being fed for human food.
- "Ducks, Breeder Developer" for ducks 8 to 19 weeks of age.
- "Ducks, Breeder" for ducks more than 22 weeks of age that are currently laying eggs.
- "Geese, Starter" for geese less than 4 weeks of age.
- "Geese, Grower" for geese 4 to 8 weeks of age.
- "Geese, Finisher" for geese more than 8 weeks of age that are being fed for human food.
- "Geese, Breeder Developer" for geese 10 to 22 weeks of age.
- "Geese, Breeder" for geese more than 22 weeks of age that are currently laying eggs.

Equine:
- "Foal"
- "Mare"
- "Breeding"
- "Maintenance"

Rabbit:
- "Rabbit, Grower" for rabbits 4 to 12 weeks of age.
- "Rabbit, Breeder" for rabbits more than 12 weeks of age.

Fish:
- Trout
- Catfish
- Fish other than trout or catfish
Guaranteed Analysis

When to state guarantees:
Guarantees are required for all feed products. The nutrients that must be guaranteed varies with the intended use of the feed. Guarantees provide the purchaser with realistic levels of essential nutrients for normal growth, development, and maintenance of the animal.

If the following substances are in a commercial feed (as required), their guarantees should be listed on the label and in the following order:

1. Crude protein (minimum)
2. Equivalent crude protein from non-protein nitrogen (NPN) (maximum)
3. Amino acids (minimum)
4. Crude fat (minimum)
5. Crude fiber (maximum)
6. Acid detergent fiber (maximum)
7. Calcium (minimum) and (maximum)
8. Phosphorus (minimum)
9. Salt (minimum) and (maximum)
10. Sodium (minimum) and (maximum)
11. Other minerals guarantees (minimum), if a requirement of a specific specie feed (grouped by units of measure).
12. Vitamins (minimum)
13. Total sugar as invert (minimum)
14. Viable microorganisms producing lactic acid (minimum)
15. Other guarantees (minimum)

How to express guarantees:
(All listed nutrients are not required guarantees. See "Specific Guaranteed Analysis" for the required guarantees.)

• Guarantees for crude protein, equivalent crude protein from non-protein nitrogen, lysine, methionine, other amino acids, crude fat, crude fiber, and acid detergent fiber must be stated as a percentage by weight.
  (Crude protein, minimum 15%)

• Guarantees for calcium, salt, and sodium when present, must be stated in the following format:
  - When the minimum is below 2.5%, the maximum shall not exceed the minimum by more than one-half of a percentage point. (Minimum 2.0%, maximum 2.5%)
  - When the minimum is between 2.5% and 5.0%, the maximum shall not exceed the minimum by more than 1 percentage point. (Minimum 3.0%, maximum 4.0%)
  - When the minimum is above 5%, the maximum shall not exceed the minimum by more than 20% of the minimum and by not more than 5 percentage points. (Minimum 28.0%, maximum 33.0%)
  - When stated, guarantees for minimum and maximum total sodium and salt, minimum potassium, magnesium, sulfur, phosphorus, and maximum fluorine, shall be expressed as a percentage by weight.

• Other mineral guarantees, when present, must be stated in parts per million (ppm) when the concentration is less than 10,000 ppm and must be stated as a percentage if the concentration is greater than 10,000 ppm or 1%.

• Guarantees for vitamins, when present, shall be stated in the following units:
  - Vitamin A, D and E, International Units per pound (IU).
  - Vitamin D3 for Poultry Feeds, International Chick Units per pound (ICU).
  - All other vitamins, milligrams per pound.

Exceptions
• When specific specie feed guarantees require a copper, selenium, or zinc guarantees, it must be expressed as parts per million (ppm).

• Guarantees for crude protein, crude fat, and crude fiber are not required when the feed is not intended to supply those items or they are present in levels too low to make a significant contribution to the intended function of the feed.

(See exceptions)
Specific Specie Feeds
Specific guarantees must be given for complete feeds and for supplement feeds.

Each of the following feeds must guarantee each of the substances listed.

Dairy cattle feed:
(See pages 19, 20, 23)

(a) A minimum guarantee for crude protein.
(b) A maximum guarantee for equivalent crude protein from non-protein nitrogen, if added.
(c) A minimum guarantee for crude fat.
(d) A maximum guarantee for crude fiber.
(e) A maximum guarantee for acid detergent fiber.
(f) A minimum and maximum guarantee for calcium.
(g) A minimum guarantee for phosphorus.
(h) A minimum guarantee for selenium, stated in parts per million (ppm).
(i) A minimum guarantee for vitamin A, other than the precursors of Vitamin A, if added.

Dairy cattle feed - Mineral supplements:
(See page 24)

(a) A minimum and maximum guarantee for calcium.
(b) A minimum guarantee for phosphorus.
(c) A minimum and maximum guarantee for salt.
(d) A minimum and maximum guarantee for total sodium, if total sodium exceeds that which is furnished by the maximum salt guarantee.
(e) A minimum guarantee for magnesium.
(f) A minimum guarantee for potassium.

(g) A minimum guarantee for selenium, stated in parts per million (ppm).
(h) A minimum guarantee for Vitamin A, other than the precursors of Vitamin A, if added.

Milk replacer fed to calves:
(See page 21)

(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for crude fat.
(c) A maximum guarantee for crude fiber.
(d) A minimum and maximum guarantee for calcium.
(e) A minimum guarantee for phosphorus.
(f) A minimum guarantee for vitamin A, other than the precursors of vitamin A, if added.

(g) A minimum guarantee for selenium, stated in parts per million (ppm).
(h) A minimum guarantee for Vitamin A, other than the precursors of Vitamin A, if added.

Beef cattle feed:
(See page 22)

(a) A minimum guarantee for crude protein.
(b) A maximum guarantee for equivalent crude protein from non-protein nitrogen, if added.
(c) A minimum guarantee for crude fat.
(d) A maximum guarantee for crude fiber.
(e) A minimum and maximum guarantee for calcium.
(f) A minimum guarantee for phosphorus.
(g) A minimum and maximum guarantee for salt, if added.
(h) A minimum and maximum guarantee for total sodium, if total sodium exceeds that which is furnished by the maximum salt guarantee.
(i) A minimum guarantee for potassium.
(j) A minimum guarantee for Vitamin A, other than the precursors of Vitamin A, if added.
Beef cattle feed - Mineral supplements:  
(See page 25)

(a) A minimum and maximum guarantee for calcium.
(b) A minimum guarantee for phosphorus.
(c) A minimum and maximum guarantee for salt.
(d) A minimum and maximum guarantee for total sodium, if total sodium exceeds that which is furnished by the maximum salt guarantee.
(e) A minimum guarantee for magnesium.
(f) A minimum guarantee for potassium.
(g) A minimum guarantee for copper, stated in parts per million (ppm).
(h) A minimum guarantee for selenium, stated in parts per million (ppm).
(i) A minimum guarantee for zinc, stated in parts per million (ppm).
(j) A minimum guarantee for Vitamin A, other than precursors of Vitamin A, if added.

Swine feed:  
(See page 26)

(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for lysine.
(c) A minimum guarantee for crude fat.
(d) A maximum guarantee for crude fiber.
(e) A minimum and maximum guarantee for calcium.
(f) A minimum guarantee for phosphorus.
(g) A minimum and maximum guarantee for salt, if added.
(h) A minimum and maximum guarantee for total sodium if total sodium exceeds that furnished by the maximum salt guarantee.
(i) A minimum guarantee for selenium, stated in parts per million (ppm).
(j) A minimum guarantee for zinc, stated in parts per million (ppm).

Poultry feed:  
(See page 27 & 28)

(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for lysine.
(c) A minimum guarantee for methionine.
(d) A minimum guarantee for crude fat.
(e) A maximum guarantee for crude fiber.
(f) A minimum and maximum guarantee for calcium.
(g) A minimum guarantee for phosphorus.
(h) A minimum and maximum guarantee for salt, if added.
(i) A minimum and maximum guarantee for total sodium, if total sodium exceeds that furnished by the maximum salt guarantee.
Sheep and Goat feed:
(See page 29)
(a) A minimum guarantee for crude protein.
(b) A maximum guarantee for equivalent crude protein from non-protein nitrogen, if added.
(c) A minimum guarantee for crude fat.
(d) A maximum guarantee for crude fiber.
(e) A minimum and maximum guarantee for calcium.
(f) A minimum guarantee for phosphorus.
(g) A minimum and maximum guarantee for salt, if added.
(h) A minimum and maximum guarantee for total sodium, if total sodium exceeds that furnished by the maximum salt guarantee.
(i) A minimum and maximum guarantee for copper, stated in parts per million (ppm), if copper is added or exceeds 20 ppm.
(j) A minimum guarantee for selenium, stated in parts per million (ppm).
(k) A minimum guarantee for Vitamin A, other than precursors of Vitamin A, if added.

Duck and Geese feed:
(See page 30)
(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for crude fat.
(c) A maximum guarantee for crude fiber.
(d) A minimum and maximum guarantee for calcium.
(e) A minimum guarantee for phosphorus.
(f) A minimum and maximum guarantee for salt, if added.
(g) A minimum and maximum guarantee for total sodium, if total sodium exceeds that furnished by the maximum salt guarantee.

Equine feed:
(See page 31)
(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for crude fat.
(c) A maximum guarantee for crude fiber.
(d) A minimum and maximum guarantee for calcium.
(e) A minimum guarantee for phosphorus.
(f) A minimum guarantee for copper, stated in parts per million (ppm).
(g) A minimum guarantee for selenium, stated in parts per million (ppm).
(h) A minimum guarantee for zinc, stated in parts per million (ppm).
(i) A minimum guarantee for Vitamin A, other than the precursors of Vitamin A, if added.

Equine feed - Mineral supplements:
(See page 32)
(a) A minimum and maximum guarantee for calcium.
(b) A minimum guarantee for phosphorus.
(c) A minimum and maximum guarantee for salt.
(d) A minimum and maximum guarantee for total sodium, if total sodium exceeds that furnished by the maximum salt guarantee.
(e) A minimum level of copper, stated in parts per million (ppm).
(f) A minimum guarantee for selenium, stated in parts per million (ppm).
(g) A minimum guarantee for zinc, stated in parts per million (ppm).
(h) A minimum guarantee for Vitamin A, other than the precursors of Vitamin A, if added.
Rabbit feed:
(See page 33)
(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for crude fat.
(c) A minimum and maximum guarantee for crude fiber. The maximum guarantee may not exceed the minimum guarantee by more than 5 percentage points.
(d) A minimum and maximum guarantee for calcium.
(e) A minimum guarantee for phosphorus.
(f) A minimum and maximum guarantee for salt, if added.
(g) A minimum and maximum guarantee for total sodium, if total sodium exceeds that furnished by the maximum salt guarantee.
(h) A minimum guarantee for Vitamin A, other than precursors of Vitamin A, if added.

Fish feed:
(See page 34)
(a) A minimum guarantee for crude protein.
(b) A minimum guarantee for crude fat.
(c) A maximum guarantee for crude fiber.
(d) A minimum guarantee for phosphorus.

Simple grain mixtures:
(With or without molasses)
(a) A minimum guarantee for crude protein.
(b) A maximum guarantee for equivalent crude protein from non-protein nitrogen, if added.
(c) A minimum guarantee for crude fat.
(d) A maximum guarantee for crude fiber.

Mineral Feeds:
(If not already identified as a specific specie feed.)

Mineral guarantees not covered under a specific species shall be listed in the following order when present:

- A minimum and maximum guarantee for calcium, if present.
- A minimum guarantee for phosphorus, if present.
- A minimum and maximum guarantee for salt, if added.
- A minimum and maximum guarantee for total sodium if total sodium exceeds that which is furnished by the maximum salt guarantee.
- A maximum guarantee for fluoride, if present.
- Minimum guarantees for other minerals that are present in significant amounts grouped by unit of measure.

Mineral guarantees shall be in the following units:

- In parts per million (ppm) if the mineral content is less than 10,000 ppm.
- As a percentage by weight if the concentration is 10,000 ppm or greater.

The following mineral guarantees shall be stated as percentages by weight of commercial feed:

- Minimum and maximum guarantees for calcium, total sodium and salt.
- Minimum guarantees for potassium, magnesium, sulfur, and phosphorus.
- Maximum guarantees for fluoride.
Ingredient Statement

Every branded feed label must have a section which lists the name of each ingredient or its collective term, used in the manufacture of that commercial feed. (A commercial feed consisting of a single ingredient defined by AAFCO is not required to have an ingredient statement if the ingredient name is used as part of the product name.)

Ingredient Names

- All must be printed in the same typeface and size.
- The names used must be either the common name or their official name as defined by AAFCO.
- No reference to quality or grade of ingredients can be made. (Grade A Whey or No. 2 Corn)
- Ingredients used as carriers for drugs, vitamins or trace minerals, do not have to be listed unless they comprise at least 1% of the feed by weight.

Collective Terms

Instead of listing each and every ingredient, the labeler may choose to use a collective term that describes one or more ingredients. When using a collective term, the individual ingredients listed under that specific collective term cannot be listed individually on a label. (If the label uses "Grain Products" you may not list corn separately). See page 15 - 17 for a complete list of collective terms.

Directions for Use and Precautionary Statements

Directions for use and precautionary statements are required for all branded feeds and customer-formula feeds when they contain a feed additive. Feed additives include things such as drugs or non-protein nitrogen ingredients.

It is essential that the use direction fit the intent declared in the label's purpose with simple and concise directions.

Every commercial feed label must include directions for the safe and effective use of the feed.

- Directions must be adequate to enable safe and effective use, including feeding and any further mixing directions.
- Precautions must be identical to the FDA defined precautions related to the drugs and feed additives. (See product labels of the ingredients that you use for specific use directions, precautions, and other limits to use.)
- Directions for medicated feed provide the user with specific information regarding the intended dose (amount fed), weight restriction, mixing instructions (if needed), and any withdrawal time.

- READ AND FOLLOW LABEL DIRECTIONS OF ALL MEDICATED SOURCES YOU USE TO MANUFACTURE FEED.
- Consult with the manufacturer of that product if you need additional information or if their directions are not clear.

- Warnings and caution statements must appear in a prominent place on the label.
- If use directions cannot be printed on the front of the label, you must direct the reader to its location on the feed label. “See back of tag for feeding directions.”
- Products containing animal proteins prohibited in ruminant feed must contain the statement "Do not feed to cattle or other ruminants." on the principle display panel.
Manufacturer or Distributor Name

• The person or firm's name that appears on the label is responsible for the feed product and complying with state and federal regulations.
• The responsible party’s principal mailing address including the street address, city, state and zip code must be printed on the label.
• The street address may be omitted if it is in the current city directory or phone book.
• If the manufacturer is not the distributor, the manufacturer’s name and address does not have to be listed.

Net Quantity Statement

• Each package, container, or bulk lot label must contain an accurate statement as to the net quantity of the commercial feed.
• The statement's terms of weight or measure must be expressed in ounce-pound units and must include the appropriate metric unit, such as 1 lb. (0.45 kg) or 1 gallon (3.78 L).

Nutritional Responsibility

Branded feeds

• A commercial feed shall be nutritionally suitable for its intended purpose as represented by the labeling.
• If a control official has reason to believe a commercial feed is not nutritionally suitable, the official may request the manufacturer to either submit an "Affidavit of Suitability" or an alternative procedure acceptable to the control official, certifying the nutritional adequacy of the feed. The "Affidavit of Suitability" or alternative procedure must be submitted within 30 days of written notification.

Affidavit

Affidavit of Suitability

(Company Name) _______________________________ (Product Name & Code Number) _______________________________

1. Affiant is the ________________________ of _______________________________ (Title) (Company Name)

and is duly authorized to make and execute this Affidavit for and on behalf of said company.

2. Affiant has knowledge of the nutritional content of the above listed feed product and is familiar with the nutritional requirements for the animal species and animal class(es) for which the feed product is intended.

3. Affiant has knowledge of valid scientific evidence that supports the suitability of the product for the intended animal species and animal class for which this feed is intended. A copy of the product label is attached to this affidavit.

### Collective Terms

* Use of ingredients identified with an asterisk (*) is restricted to nonruminants unless this ingredient source is pure porcine or equine material. Feeds containing these ingredients must bear the following label statement: "Do not feed to cattle or other ruminants."

#### Animal protein products.
1. Animal blood, dry
2. *Animal by-product meal
3. Buttermilk, condensed
4. Buttermilk, dried
5. Casein
6. Casein, dry hydrolyzed
7. Cheese rind
8. Crab meal
9. Fish by-product
10. Fish liver and glandular meal
11. Fish meal
12. Fish protein concentrate
13. Fish residue meal
14. Fish solubles, condensed
15. Fish solubles, dried
16. *Fleshings hydrolysate
17. *Hydrolyzed hair
18. *Hydrolyzed leather meal
19. Hydrolyzed poultry by-product aggregate
20. Hydrolyzed poultry feathers
21. Lactalbumin, dried
22. Leather hydrolysate
23. *Meat and bone meal
24. *Meat and bone meal tankage
25. *Meat by-products
26. *Meat meal
27 *Meat meal tankage
28. *Meat solubles, dried
29. Milk, dried whole
30. Milk protein, dried
31. Poultry by-products
32. Poultry by-product meal
33. Poultry hatchery by-products
34. Shrimp meal
35. Skimmed milk, condensed
36. Skimmed milk, condensed cultured
37. Skimmed milk, dried
38. Skimmed milk, dried cultured
39. Whey, condensed
40. Whey, condensed cultured
41. Whey, condensed hydrolyzed
42. Whey, condensed product
43. Whey, condensed solubles
44. Whey, dried
45. Whey, dried hydrolyzed
46. Whey, dried product
47. Whey, dried solubles

#### Forage products.
1. Alfalfa hay, ground
2. Alfalfa meal, dehydrated
3. Alfalfa meal, sun cured
4. Coastal bermuda grass hay
5. Corn plant, dehydrated
6. Dehydrated silage (Ensilage pellets)
7. Flax plant product
8. Ground grass
9. Lespedeza meal
10. Lespedeza stem meal
11. Soybean hay, ground

#### Grain products.
1. Barley
2. Corn
3. Grain sorghum
4. Mixed feed oats
5. Oats
6. Rice
7. Rice, Brewers
8. Rice, ground brown
9. Rice, ground paddy
10. Rice, ground rough
11. Rye
12. Triticale
13. Wheat

Potassium, minimum .........................................................6.40%
Vitamin A, minimum .........................................................10,000 IU/LB

Ingredient Statement

Grain Products, Plant Protein Products, Processed Grain By-
Products, Urea, Calcium Lignin Sulfonate, Animal Fat, Vitamin A
Supplement, D-Activated Animal Sterol (source of Vitamin D3),
Vitamin E Supplement, Folic Acid, Ethoxyquin (a preservative),
Ground Limestone, Dicalcium Phosphate, Salt, Copper Sulfate,
Manganese Oxide, Zinc Oxide, Ferrous Sulfate, Cobalt
Carbonate, Calcium Iodate, Sodium Selenite.

FEEDING DIRECTIONS:

Feed as the complete grain ration.
Provide forages and fresh water.

YOUR NAME FEEDS
City, State, Zip

NET WT 50 LB (22.67 kg)
USE DIRECTIONS:
Mixing directions:
Must dilute prior to feeding. Mix:
Corn ............1400 pounds
Oats ..............200 pounds
Start-Her..........300 pounds
2:1 Mineral .....50 pounds
Bulky Sweet ....50 pounds
total..............2000 pounds

Resulting mixture will contain 56.2 mg/lb of monensin.

FEEDING DIRECTIONS:
For increased rate of weight gain, feed at a rate of 50 to 200 mg monensin/head/day in not less than 1 lb of feed or, after Day 5, feed at a rate of 400 mg/head/day every other day in not less than 2 lb of feed.

Example: feed the 56.2 mg/lb monensin mixture at a rate of 3.5 lb/head/day to supply 200 mg monensin.

CAUTION: Do not allow horses or other equines access to feed containing monensin. Ingestion of monensin by horses has been fatal. Monensin medicated cattle feed is safe for use in cattle only.

Consumption by un-approved species may result in toxic reactions. Feeding undiluted or mixing errors resulting in high concentrations of monensin has been fatal to cattle. Must be thoroughly mixed in feeds before use. Do not feed undiluted. Do not exceed the levels of monensin recommended in the feeding directions as reduced average daily gains may result. Do not feed to lactating dairy cows.

The following information must be included if the feed is medicated:

1. The word "Medicated" directly below the product name.
   - Printed in type no less than one-half the type size of the product name.
   
   *For example:*

   **Calf Starter**
   
   **Medicated**

2. The medicated claim for each drug contained in the feed product.
   - This is a statement that clearly explains the purpose of each and every drug included in the feed.
   
   *For example:*

   "For increased rate of weight gain"

   - FDA must approve this claim for this specific drug, dose, species and class of animal.

3. The name and level of the active drug ingredients.
   - This must be the established, common or usual name. Not the drug trade or brand name.

4. The guaranteed level of active drug present in the finished feed product.
   
   *For example:*

   "Lasalocid Sodium...............100g/ton"

5. If an antibiotic is present in a quantity less than 2000 grams per ton, the drug guarantee should be expressed in "grams per ton."

6. If an antibiotic is present in a quantity greater than 2000 grams per ton, the drug guarantee should be expressed in "grams per pound" or as a percentage.

7. Milligrams per pound may be used for drugs or antibiotics in lieu of a percentage, when indicated dosage on label is in mg/pound.

8. Directions for safe and effective use
   - See page 13 for specific requirements for use directions and precautionary statements for medicated feeds.

   - For specific information regarding medications and their specific uses see the following resources:

   1. 21 CFR Section 558, Federal Food and Drug Administration
   2. Feed Additive Compendium, Miller Publishing Minnetonka, MN 55343
   3. Feed label of medicated ingredients used to manufacture your specific feed.
   4. FDA's Center for Veterinary Medicine web site: http://dil.vetmed.vt.edu/
Names and Addresses of Feed Control Officials
