

## TESTING ON PRIVATE SAMPLES

Our office is often asked if we can analyze products for chemical analyses. The Office of the Texas State Chemist does not run chemical analysis on private samples. However, as a courtesy we have put together a list of laboratories. The Office makes no warranty as to their capabilities nor makes any recommendations be made about a specific laboratory. This list is not comprehensive and there are other laboratories not listed that are able to provide this service.

### List of Commercial Laboratories

(Revised March 17, 2014)

#### **Eurofins Scientific Inc.**
